TTF's 3rd Restroom Coming Soon

Construction on the Heron Creek Restroom, known affectionately as the "Leaner," will break ground this spring. Last year's Trail Memory Board and survey concluded that over 80% of Trail users want additional...
restrooms at the Trail. The new design addresses many Trail users' priorities, including female and male stalls, adequate lighting, and shade.

Local architecture firm, Mell Lawrence Architects will be on site Saturday, April 12th to unveil the renderings of the proposed restroom so Trail users can 'Meet the Architect'. Their firm has been voted AIA Austin Firm of the Year in recognition of its consistent design excellence. They have a passion for merging the realities of everyday life with the architectural principles of light, design, and sustainability. Mell's work has been published extensively and recognized with design awards at the local, national, and state levels.

The architect will be onsite to answer questions and go over the design. Please join us!

Saturday, April 12 at 8:00am-10:00am
At the existing Heron Creek Restroom
Located on The Trail, east of Lamar, south of Austin Pets Alive

An Amplified Butler Trail

There were many amazing organizations that participated in Amplify Austin this year and we are grateful many of you selected The Trail Foundation as your beneficiary. Thanks to you, TTF raised more then $18,000 in 24 hours. When you couple that with our Board match, TTF brought in over $36,000 for our beloved Trail.

So Long Winter!
Spring has sprung, which means it is time to shed those long sleeves! This year's TTF and Boardwalk inspired tech shirt is available for purchase at Luke's Locker with 100% of the proceeds benefiting the Trail.
Thank you to the 18 volunteers from UT's Gamma Beta Phi who replaced 15 trees and mulched 50 at the Lamar Beach Tree Grove on Saturday, March 1st for this year's It's My Park Day. These beautiful trees will grow to shade, beautify and diversify the Trail.
TTF partnered with Marathon High to give their students a glimpse of the Boardwalk. These junior and high school students recently completed their first half and full marathon and cannot wait to use the Boardwalk when training next year!

**Trail Tale from the Trail Memory Board**

Following is another memory left on the Trail Memory board last February. Thank's to all of you who shared your memories and stories.

"I come to the Trail for serenity. I have been living w/ a chronic illness for 6 years + this is the place I can release all those feelings. I love the Trail!"
